## Addiction Counselor Education - Associates in Arts

**Area of Study: Public Service, Society and Education**

Clark's Addiction Counselor Education program includes theories and principles that teach students practical methods to work within in a continuum of care with both patient and external support systems. Students will learn to develop the necessary skills to treat clients in multiple areas, including individual and group counseling settings. In addition to classroom theory, students receive exposure to real-world work settings with participating local agencies. Clark also provides training for successful completion of the Washington Chemical Dependency Professional State Exam.
