

Baking & Cooking

An annual follow-up of students in the Career and Technical programs has been completed each year since 2002 by the Office of Planning and Effectiveness. The purpose of the report is to collect students' feedback about the college and their specific career and technical program to support continuous improvement efforts. This survey is the only way to provide consistent data at the college and department level regarding student employment and wage ranges. Information at the department level does not have enough respondents to be representative of the entire department or students thereof. However, this data does provide indicators of outcomes for program review and outcomes assessment projects.
