Purpose Statement

Clark College's Information Technology teams are focused on efficient and effective support for academics, administrative, and technical support services. Clark College's Information Technology Services department provides service and support for students, faculty and staff supporting Clark College's main campus and its satellite locations serving the greater Vancouver area. Clark College IT services is segmented into departments that provide specialty support services in all given areas of IT in support of Clark College's strategic, academic, and social equity plans.

The goal of our project work is to identify and integrate the technology solutions necessary to fulfill the Clark College mission and accomplish the college-wide objectives with the Clark College 2020 Strategic Plan and is also in alignment with the Information Technology 2019-2023 Strategic Plan. Each project listed identifies how it aligns with Clark College's Strategic Goals, Operational Goals and the 2020-2021 Major Objectives.
