Corporate & Continuing Education receives grant dollars to provide training for caregivers

Against the backdrop of a tight economy and the expanding need for caregivers, Clark College has received a \$20,000 grant under the 2009 Community College Caregiver Training Initiative. The initiative, which is funded by MetLife Foundation, will expand home-based caregiving training capacity by making it accessible online to a greater audience and improve education and access to home-based caregiving training for family caregivers.

According to Todd Oldham, executive director of Corporate and Continuing Education (CCE), “Clark College intends to meet the demand of this significantly growing industry by developing a more effective home-based caregiver training program. The training will also support family caregivers who want to care for their older relatives.”

The program will provide home-based caregiver training content through a series of 10 e-learning

modules. The content of the learning modules will consist of high-definition videos illustrating the proper techniques for home health care, each lasting between five to 10 minutes. It will also include reading assignments, exercises and online assignments. “Many of these family caregivers are balancing their work, their family and caring for an older relative all at the same time,” said Oldham. “Training in an alternative format of distance learning will be easier to accommodate into an already over-crowded schedule.”

Techniques demonstrated on the video portion of the e-learning modules include, but are not limited to: mobility, changing a client’s position, transfers, body mechanics, fall prevention, bathing, toileting, hand washing, cleaning & disinfecting, and safe food handling practices. Each video vignette will be narrated and filmed within either a simulated or actual home care setting. The final videos will be professionally edited and hosted from within CCE’s Moodle Learning Management System (LMS).

In Washington state, the demand for caregiving training will increase even more in the future due to changes in educational requirements for caregivers of the elderly and disabled. The caregiver will be required to complete a new 75-hour entry-level training and then has 120 calendar days to complete an additional 70 hours of training consisting of core and patient-specific competencies.

CCE has been providing caregiving training since

“Many of these family caregivers are balancing their work, their family and caring for an older relative all at the same time.”

—TODD OLDHAM,
executive director
of Corporate &
Continuing Education

1997. It has two existing caregiving programs: Fundamentals of Caregiving (FoC) training and Nursing Assistant Certified (NAC). Another new program, Adult Family Home Care Administrator training, will begin in fall 2009.

Automotive professor named 2009 Educator of the Year

Clark College automotive professor Mike Godson was named Educator of the Year during the 2009 North American Council of Automotive Teachers (NACAT) conference. The annual award is presented for excellence in automotive repair instruction.

Godson is head of the automotive department at Clark College. He is also a Toyota Technical Education Network (T-TEN) instructor, a chairperson on the Toyota T-TEN National Advisory Council, a National Automotive Technician Education Foundation (NATEF) evaluation team leader and a Washington Department of Ecology authorized emission specialist. In addition, Godson is Automotive Service Excellence (ASE) Master and L-1 certified.

Selection criteria for the annual Educator of the Year award requires that a master automotive technician excel on all ASE automotive tests including A1–A8 (engine repair, automatic transmission/transaxle, manual drive train and

Mike Godson (right), head of Clark's automotive department, was named 2009 Educator of the Year by the North American Council of Automotive Teachers (NACAT). He is congratulated by Ted Kotsakis (left), dean of Business & Technology.

axles, suspension and steering, brakes, electrical/electronic systems, heating and air conditioning, engine performance) and the L1 (Advanced Engine Performance Exam). This year, Godson received the highest score among all automotive teachers in North America.

Godson received the award during the NACAT conference, which was held July 20-24 at Central Piedmont Community College in Charlotte, N.C. The award was presented by officials of NACAT and corporate supporter Mitchell 1. Godson received a recognition certificate and a check for \$500. In addition, in support of student success, the college will receive a free one-year subscription to Mitchell's online technical help bulletins.

Vice President of Instruction Dr. Rassoul Dastmozd said, "As head of our automotive program, Mike Godson demonstrates excellence every day. It's gratifying to see that expertise recognized and honored by Mike's peers from across the nation."

"I have always believed that strong industry experience is a requirement for any automotive instructor," said Godson, who had 17 years

of automotive technician experience before joining Clark's automotive department full time in 1995. "Staying fully ASE certified and working in the industry during the summer months helps me remain current and proficient with existing automotive technology. The process of continuous learning and demonstration of technical skills lays the foundation for effective automotive training."

College community gathers to seal and “Scend” a message to future members of the Penguin Nation

In a year of celebrations, July 30, 2009, was another day to make history at Clark College. As the college continued the yearlong celebration of its 75th anniversary, members of the college community gathered to close and seal Clark’s 75th anniversary time capsule.

Encased within the sculpture entitled “Scend,” by metal arts instructor Beth Heron, the time capsule is located on the plaza north of Gaiser Hall. The sculpture was unveiled at the opening of the 50th anniversary time capsule on May 12.

“The sculpture ‘Scend’ is an example of the symbol-making process,” said Heron as she addressed the crowd. “It has become the symbol for all those things that we wish to convey to the future Clark College at its 100th anniversary. For those future students, faculty and administration, the sculpture and time capsule will both literally and symbolically convey a message. I feel it is a message of confidence and belief in Clark College’s positive contribution to our community and to its future.”

A portion of the text that will appear on the plaque next to the sculpture and the waterfall reads in part: “With an unwavering belief in the bright future envisioned by our college’s founders, we entrust this sculpture to those who follow—receiving the messages that we send—flowing, as a wave, through time.”

Placement and preparation of the sculpture and time capsule were managed by members of Clark College’s Facilities Services department. “We felt it should be

Clark College metal arts instructor Beth Heron sculpted “Scend” to serve as a symbol of carrying forth the message of the college’s positive contributions to our community and to its future.

perfectly aligned to have it see through the heart of the college—that it should be staring down the core of our existence,” said Facilities Maintenance Manager Blue Linden. This was no small task given that its location has four different leveling points and five different angles. Led by maintenance mechanic David Ek, Linden and maintenance mechanic Cisco Medrano shimmed and leveled the base before cementing it—perfectly level—into place. “The base was a 12-hour installation with 25 years in mind,” said Linden.

In May, the sculpture was placed by another crew, led by maintenance mechanic Billie Garner, in advance of its dedication. Final preparations

Continued on the next page

Left: Members of Clark College's Facilities Services department (Jim Green, director of Facilities Services, in plaid, and Billie Garner, maintenance mechanic, opposite) lift the 75th anniversary time capsule into the base of the sculpture located on the north plaza of Gaiser Hall.

Right: Step two of the time capsule sealing was to place the sculpture, "Scend," created by metal arts instructor Beth Heron, on top of the column holding the time capsule. Those heavy lifting duties were handled skillfully by (from left) Blue Linden, facilities maintenance manager; Tom Kaarto, maintenance mechanic (behind sculpture); and Randy Hug, maintenance mechanic.

included sealing the time capsule and cleaning the sculpture; following the ceremony, the sculpture was secured to the base. "I'll give Beth a double A+," said Linden of the time capsule and sculpture. "It is just totally awesome."

Funding for the sculpture that houses the 75th anniversary time capsule was

provided by an anonymous donor; Arnerich, Massena and Associates; Dr. Charles Clemans; and Nancy Hungerford.

The new time capsule will be opened during the college's 100th anniversary celebration during the 2033-2034 academic year.

Scholarships score grand slam at golf tournament

In a philanthropic drive to boost student scholarships, 76 golfers braved triple-digit degree weather at Camas Meadows Golf Club on July 27 at the 18th Annual Clark College Foundation Charity Golf Tournament. The net proceeds will be approximately \$33,000 as a result of corporate sponsorships; registration fees; games; collective bid; and a live auction for three separate multi-course dinners, each prepared and served Iranian style by Ara Serjoie, the foundation's vice president for development.

For the third year in a row, iQ Credit Union was the title sponsor. "There are a lot of people who are turning to Clark College these days for education and retraining. The golf tournament is so important for raising scholarships that will make a big difference to folks," said Danette LaChapelle, iQ Credit Union's senior vice president for marketing. "As a local business, helping people help themselves is very important to us."

Joining iQ Credit Union as major sponsors were LSW Architects, P.C., *The Columbian*, UnionBank, and Waste Connections, Inc. Supporting sponsors included Chips Palace Casinos, Davidson & Associates Insurance, Hi-School Pharmacy/Hardware, Berger/ABAM, Keil Enterprises, Les Schwab Tires, Peterson & Associates, P.S., Moss-Adams LLP, Team Construction, Umpqua Bank, and 40 Et 8.

Bottom: Demonstrating a proper stance with head down, balance, rotation, and swing, interim Clark College Athletic Director Denny Huston's golf ball takes flight. Note the white blur off the right ankle of teammate and observer Gary Gehrman (right).

Vancouver meteorologist Rod Hill led the short and lively luncheon program which included comments by scholarship recipient Mikah Bacon. A graduate of Washougal High School with a 3.94 GPA, Bacon will begin his studies at Clark this fall with plans to complete science courses before transferring to a university to study pre-med. A Running Start student, Bacon hopes to enter the field of ophthalmology.

For the upcoming 2009-2010 academic year, nearly \$500,000 has been awarded in scholarship support to Clark College students through the thoughtful generosity of many individuals and corporations. "Camas Meadows is so beautiful that it's easy to have fun, even when it is 100 degrees," said Lisa Gibert, foundation president/CEO. "The bigger picture is how the tournament benefits Clark College students. Our sponsors and golfers know the need for scholarships is high and their support is especially generous in this economy."

Top left: (from left) On hole two, Jamie Dotson of iQ Credit Union hopes to spot a hole-in-one winner along with Sara Ross, Clark College women's softball coach, and Andre Hawkins, assistant coach for the Clark College women's basketball team.

Clark College participates in federally funded program providing summer jobs for area youth

Southwest Washington area youth have gained job skills—and a paycheck—through the Summer Youth Employment Program (SYEP), coordinated by the Southwest Washington Workforce Development Council (SWWDC) and funded through the American Recovery and Reinvestment Act (ARRA).

As one of 126 organizations providing employment opportunities to low-income youth ages 14-24, Clark College has employed students as computer lab assistants, grounds maintenance crews, and research/project assistants at the Clark College Foundation. “I’ve been able to apply my background in social sciences and human resources toward events and projects that help raise money for Clark student scholarships,” said recent WSU Vancouver grad and SYEP participant Mallory Knutson, who is working at the Clark College Foundation. “I hope this real-world experience at the foundation, along with my degree, will give me an advantage landing a job in this challenging economy.”

Mallory Knutson (left) and Jacqueline Rodriguez—who will attend Clark College this fall—are gaining valuable work experience at the Clark College Foundation through the Summer Youth Employment Program.

The benefits of the program extend to employers as well, as noted by Interim Athletic Director Denny Huston. “We are providing 18- to 24-year-olds an opportunity to grow in their working experience,” he said. “Facilities Services staff were able to provide them the needed supervision...[and] we benefited because these individuals were able to help restore our baseball field. Without this help, our current staff would not have had the time to take on this added field.”

“The Summer Youth Employment Program has been a golden opportunity for Clark College and the surrounding communities to help each other,” said grounds manager Skip Jimerson. “The four young men that have been working with the Grounds Department have been helpful in recovering

‘lost ground’ on the athletic fields. In addition, this partnership has given the grounds crew an opportunity to grow as mentors. The experience of the program has been a win/win situation.”

In addition to on-the-job skills and a paycheck, program participants receive work-readiness training sessions each week—another aspect of the program in which Clark participates. The college provides training space and equipment, and members of the Career & Employment Services staff are conducting training sessions on topics such as resume writing and career exploration. “Those 100-plus people are here at the college—becoming familiar with Clark, seeing Clark faces,” said Career & Employment Services Director Edie Blakley. “They will see Clark as a viable option for their future.”

A total of 690 youth in Clark, Cowlitz and Wahkiakum counties were placed in summer jobs, which last from July 6 to August 21. According to SWWDC, participants will collectively earn more than \$1.1 million through the program.

Long after the money they’ve earned has been spent, though, these youth will have a greater understanding of what it means to be an employee—from employer expectations to work ethic and personal responsibility. It is these skills which will serve them well in the future. “People who might not be able to get jobs are working—and receiving training they can use for the rest of their lives,” said Blakley.

Change in bus passes enhances commute trip reduction program

As part of Clark College's commute trip reduction (CTR) program, eligible full-time and part-time faculty and staff are eligible to receive a fully subsidized one-zone C-TRAN bus pass for use in reducing the number of single-passenger vehicles commuting to the college.

Beginning this fall, the C-TRAN passes offered to employees through CTR will be the same as those offered to students through the BackPASS program. By changing to this type of pass, the college has significantly reduced its cost to administer the bus pass program for employees—and expand the number of passes offered.

“Clark College is excited to partner with C-TRAN and offer this bus pass program to employees,” said Vice President of Administrative Services Bob Williamson. “By reducing our direct costs to purchase the passes we are able to open the program to any college employee—full- or part-time—who actively participates in CTR.”

As with the previous passes, there will be no cost to employees for the one-zone pass. (Employees who live in Oregon must pay the difference between the one-zone pass rate provided by the college and the all-zone pass rate.) Employees must sign up through Human Resources, and must agree to use the pass at least 60 percent of the time to commute to and from work.

Unlike the previous employee bus passes, there are periods during the year

when C-TRAN does not issue passes to the college. During this time (from the last day to withdraw from classes until one week before the first day of the next quarter), employees are unable to obtain the subsidized pass. Employees who are hired during these periods—or who decide to join CTR during this time—will have to wait until the next available opportunity to obtain a bus pass. (Employees who already have a pass may continue using them during this period; the restriction applies only to the purchase of new passes, not the use of current/existing passes.)

By implementing this reduced rate, college officials hope more faculty and staff will participate in the CTR program, helping to reduce the number of drivers on the road and, in so doing, help preserve the environment.

Further details about CTR and C-TRAN bus passes for employees are available through the Human Resources office, 992-2381.

ASCC announces election results; accepting applications for additional positions

The Associated Students of Clark College (ASCC) announces the final outcome of the elected officers for the 2009-2010 academic year:

ASCC President *Ashley Schahfer*

ASCC Vice President *Hana Lim*

ASCC Club Coordinator *Rebecca Montoril*

Applications are now being accepted for the ASCC activities director and the ASCC executive assistant positions. Application materials are located at the front desk of the Office of Student Life and Multicultural Student Affairs (Penguin Union Building room 160) and in the concourse of the Penguin Union Building.

Please encourage students to apply for these positions. Questions may be directed to Carrie Weikel-Delaplane, director of Student Life and Multicultural Student Affairs, 360-992-2406 or cweikel@clark.edu.

Completed applications are due by Monday, August 17, 2009.

The 2008-2009 Associated Students of Clark College leadership team. Applications are now being accepted for the positions of ASCC activities director and ASCC executive assistant for the 2009-2010 school year.

In Memoriam: Dr. Samuel Kelly, Sr.

Dr. Samuel Kelly, Sr., passed away on Monday, July 6, 2009.

Dr. Kelly earned bachelor of science and bachelor of arts degrees from West Virginia State College, and a master of arts degree from Marshall University. He earned his Ph.D. from the University of Washington.

He worked at Everett Junior College, Shoreline Community College, and was the first Vice President for Minority Affairs at the University of Washington. After moving to Vancouver in 1991, Dr. Kelly taught United States history as an adjunct faculty member at Clark College for nine years.

Dr. Samuel Kelly, who taught U.S. history as an adjunct faculty member at Clark College from 1991 to 2000, died July 6, 2009.

Upcoming Events

For additional information, see the activities calendar on the Clark College Web site: www.clark.edu/news_events/college_calendar/

(Unless otherwise noted, all events take place on the Clark College main campus. If you need accommodation due to a disability in order to fully participate in an event, contact the Disability Support Services Office at 360-992-2314 or 360-992-2835 (TTY), or visit Gaiser Hall Room 137.)

delights!**

WPEA/ UFCW Meeting Schedule

The classified employees WPEA/UFCW union meeting is held every third Wednesday of the month from noon to 1:00 p.m. in Scarpelli Hall room 214. The next meeting will be held August 19, 2009.

From the HR Department

ARE YOU COVERING YOUR SPOUSE OR OTHER DEPENDENTS ON YOUR HEALTH OR DENTAL INSURANCE PLAN?

IF SO, PEBB WILL SOON REQUIRE PROOF OF THEIR ELIGIBILITY.

If you have family members enrolled on your PEBB health coverage, you will receive a mailing from the PEBB Program in September explaining their new process for verifying your family members' eligibility. PEBB already verifies the eligibility of some family members, like students over age 20. This fall, PEBB will start verifying eligibility for all covered family members enrolled under an employee's account.

WHAT WILL YOU NEED TO DO?

In September, the PEBB Program will mail a letter to subscribers who have family members enrolled on their account. The letter will explain PEBB eligibility rules, and include forms for subscribers to either:

- Remove ineligible family members, or
- Provide proof for eligible family members (such as a copy of a tax return or similar legal document).

Subscribers must either remove or provide proof of eligibility for their family members by the end of the annual open enrollment period – November 30, 2009. If a subscriber doesn't respond, PEBB will disenroll all covered family members from the account in early 2010.

WHY IS THE PEBB PROGRAM DOING THIS?

Your health coverage is a valuable benefit— and costly for the state to provide. The PEBB Program spends \$1.5 billion annually on health care; this benefit

becomes more costly for both you and the state when PEBB covers individuals who don't qualify for health coverage. This verification process ensures that the state uses taxpayer dollars fairly and consistently to only cover eligible family members.

SAVE ON GAS – TAKE ADVANTAGE OF COMMUTE TRIP REDUCTION PROGRAM

Automobiles are one of the most significant sources of air pollution in the Vancouver-Portland metropolitan area. Reducing the number of people who drive to work alone may be the most important and most effective measure we can take to help preserve our environment.

There are a number of ways that Clark College employees can participate in the commute trip reduction program. Most options include the additional feature of a guaranteed ride home:

- Bike riders will find bicycle racks and bike shelters on the main campus. Bike riders may also receive a helmet.
- Walkers are eligible for an umbrella.
- Riders and van poolers are also eligible for the guaranteed ride home.
- Bus riders are eligible for subsidized transit passes (free for one-zone travel).

Other services in support of the commute trip reduction program include personal laundry pick-up and delivery on the main campus and use of lockers on the main campus.

To receive a college-provided C-Tran bus pass, employees must first sign up to participate in the CTR program and agree to use the bus at least 60% of the time to commute to and from work.

To sign up for the Commute Trip Reduction program feature that meets your commuting needs, call Laura Elwood-Klein in Human Resources, 992-2381.
